DRACUL SITUATION WITH COVID-19

Wednesday, March 25, 2020

To Dracul Citizens,

I am pleased to report positively on the situation with COVID-19 regarding Dracul. As of today, there are 0 cases of coronavirus in Dracul, affecting either citizens, visitors, or wildlife. As you know, this pandemic has affected the world largely, and all governments are doing the best they can to rectify the situation.

It's a wise idea to self-isolate for at least 7-14 days, to avoid meeting those possibly affected. In addition to that, it can take up to 2 weeks for symptoms to appear. Please use proper hygiene standards to avoid receiving or passing the virus to others.

Fortunately, the world has not had an issue to this extreme in quite a long time. I invite all Draculians and others in the world to do their part in preventing spread. Should the situation change for Dracul, we will be sure to inform all citizens as quickly as possible. I certainly thank you for your time and wish you the best, while we fight this invisible enemy.

Best regards,

Stephen Luke

Stephen Luke
